

Alexine Martina

Product designer

I utilize an AI-assisted workflow throughout the design process: problem exploration with an LLM, rapid prototyping in Claude/Cursor, and delivery through development-ready designs in Figma.

Currently a senior designer at Vroom, with some fun contract work on the side building an admin platform for AI education support.

Experience

Staff product designer

 Dorxata

Dec 2024 - present

Deployed as the sole product designer for LearnWise.ai, a multi-tenant AI SaaS platform for educational institutions.

I collaborate directly with their founding team to design admin tooling for AI assistant customization that scaled to from 1 to 2M users and 40 to 150+ institutions within a year. Designed and shipped an analytics dashboard, a knowledge-base builder supporting third-party integrations, and a modular workflow builder for mapping conditional logic and automations.

Senior product designer

 Vroom Group

Feb 2020 - present

I manage a 2-person design team across the company's car rental and insurance platforms.

Designed and shipped an end-to-end claims operations platform, enabling a newly formed internal team to process 600+ insurance claims annually in compliance with Australian regulations.

Led a ground-up redesign of the core booking funnel, focusing on information architecture, usability, and WCAG compliance. The pilot achieved a 27% YoY uplift in conversion rate across mobile (+30%) and desktop (+28).

Product designer

 Jumpcut (YC16)

Sep 2019 - Feb 2021

I designed the end-to-end UX of conversion-critical flows such as enrollment and checkout for an e-learning platform, covering research, user stories, flows, and visual design. I also led the creation of their design system, Paradigm, with 2 other designers.

UX designer

 Globe Telecom

Apr 2018 - Aug 2019

I worked in enterprise, designing end-to-end user journeys and interfaces for several employee-facing mobile and web applications used across a workforce of 40,000+ employees. I facilitated user research workshops and synthesized insights from focus groups to help shape product direction.

Front-end developer

Vroom Group

Aug 2017 - Apr 2018

I assisted our Front-end team in building websites using React, Bootstrap, and CSS/SCSS. I brought product visions to life with coded prototypes that became the shipped product.

I was asked to return as a senior product designer in Feb 2020.
